

## **Consulting for E-commerce subject to information requirements**

**Are you planning to expand your business activities onto the Internet or expand your existing Internet presence? Would you like to open up an online shop or operate an existing trade platform such as eBay or Amazon or establish another Internet offering? Then you should consider the myriad of provider- and offering-related information requirements that are intended to provide the maximum amount of transparency for Internet users. Faulty information statements put you at a high risk of receiving warning notices, which is why a corresponding legal review is beneficial.**

### **What we offer**

We will subject your Internet presence to a comprehensive review and will present you with the relevant mandatory information. Furthermore, we will provide you with concrete wording suggestions and will place these at the correct location of your Internet presence and effectively incorporate the wording into any contracts. This applies to both provider- and product-based information requirements. If you sell, for example, textiles, chemicals, or cosmetics, you must also provide information regarding the composition, hazards, shelf life, etc. We will help you gain an overview of the numerous legal requirements and fulfill them.

### **Scope of service**

- Review of the existing information for conformance with the law
- Determining the industry- and product-specific information requirements
- Consulting regarding necessary or beneficial changes
- Creating legal text to fulfill the existing information requirements

### **Costs**

We normally offer our consulting services to you calculated according to the time spent at a suitable hourly rate. We believe that cost transparency and cost reliability form the basis of successful cooperation. We will be happy to provide you with an estimate of the expected costs before taking the job.
